

U.S. Patent Appl. No. 09/019,441  
Attorney Docket No. 037003-0275470

**REMARKS**

The foregoing amendment corrects recently discovered typographical errors in the specification. With respect to the change on page 62, "235" is added to the parenthetical to specify that replacement of residue 235 had been performed. The same sentence describes that "alterations in residues 234, 235, 235, and 237 at least affect affinity for the Fc gamma R1 receptor." Based on the sentence structure, and the repetition of identified residues, it is clear that the replaced residues are the same as altered residues, and that "235" was inadvertently omitted in the second recitation of residues. No new matter is added.

Entry of the foregoing amendment will not require the application to be withdrawn from issuance. The issue fee has not been paid

Should any questions arise regarding the proposed amendment, the examiner is kindly requested to contact the undersigned attorney at the telephone number listed below.

Respectfully submitted,

PILLSBURY WINTHROP LLP
